-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

I. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

A. Claims 1-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Kono, US No. 2002/0130469 ("Kono").

i. In Short, Kono discloses a brush seal (Fig. 1) comprising a side plate (8). There is a back plate (9) having a perimeter (FIG. 2). There is a bristle ring (4) disposed between the side plate and the back plate (FIG. 2). There is a plurality of fasteners (15) securing the back plate to the side plate and pressing the back plate and the bristle ring against the side plate (FIG. 2).

ii. The side plate (8) is annular in shape and includes a plurality of apertures (16) adapted to receive a plurality of fasteners.

iii. The back plate (9) includes a recess for receipt of the bristle ring. The side plate includes a recess forming a pinch point (5a).

iv. The plurality of fasteners is threaded (see FIG. 10, showing 13 fastened to 15, arrangement necessarily has threads).

Response to Arguments

II. Applicant argues that the Kono reference does not teach the plurality of fasteners engaging only a perimeter of the backing plate. Examiner disagrees; Applicant is interpreting the limitation "perimeter" more narrowly than is required.

A. Examiner has determined that the concentric circle of holes spaced along the backplate constitutes its perimeter i.e. "the boundary of a closed plane figure" see Webster's tenth edition. If Applicant wishes to claim that his fasteners are located radially outward of the outer most edge of the backplate, as shown in FIG. 2, Examiner will remove the Kone reference as a basis for rejection.

III. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
